

High white photo satin 170gsm(GRA718)

Economical high white satin finish with a microporous coating. It has a smooth surface for high quality photo reproduction.

Technical Specification

	Value
WEIGHT	170GSM
OPACITY	>86%
WHITENESS (CIE)	145%

Applications and Characteristics

- High white satin microporous coating
- High opacity
- Fast drying
- Very durable
- Brilliant photo reproduction

Compatibility Notes

As with all microporous coatings, 'Gas Fading' as well as 'UV Fading' may occur when printing with Dye inks. Whilst each substrate has been trailed across a variety of large format printers, we would strongly recommend that you or your customers also undertake a thorough product evaluation to accommodate the numerous variables in rips and hardware.

Ink Compatibility

- Dye
- Pigmented
- Latex

Storage and Transport

Storage temperature - +10°C - +25°C Storage humidity - 33% - 65% We recommend that you always keep this product in its original packaging when not in use.
